

Arboviral Surveillance Report

June 15th, 2021

Surveillance

This report provides data on Week 23 of surveillance for West Nile virus (WNV) in mosquitoes and includes data on other surveillance indicators. O'Hare traps set during Weeks 19 through 22 are included as well. Gravid traps are placed throughout the City of Chicago and monitored twice a week for the duration of the mosquito-breeding season. For this reporting period, there were zero (0) WNV positive mosquito pools.
